# INDEX

**Acrivos, A.** *See* Brady & Acrivos

**Arie, M.** *See* Kiya, Suzuki, Arie & Hagino

**Atkinson, K. N., Khan, Z. A. & Whitelaw, J. H.** Experimental investigation of opposed jets discharging normally into a cross-stream, 493–504

**Brady, J. F. & Acrivos, A.** Closed-cavity laminar flows at moderate Reynolds numbers, 427–442

**Brady, J. F. & Acrivos, A.** The deformation and breakup of a slender drop in an extensional flow: inertial effects, 443–451

**Brown, S. N. & Stewartson, K.** On the nonlinear reflection of a gravity wave at a critical level. Part 2, 217–230

**Brown, S. N. & Stewartson, K.** On the nonlinear reflection of a gravity wave at a critical level. Part 3, 231–250

**Bryant, P. J.** Two-dimensional periodic permanent waves in shallow water, 525–532

**Criminale, W. O.** *See* Spooner & Criminale

**Dagan, Z., Weinbaum, S. & Pfeffer, R.** An infinite-series solution for the creeping motion through an orifice of finite length, 505–523

**Deardorff, J. W. & Willis, G. E.** Dependence of mixed-layer entrainment on shear stress and velocity jump, 123–149

**DeWitt, R. J. & Wright, J.** Self-consistent effective-medium theory of random internal waves, 283–302

**Escudier, M. P. & Zehnder, N.** Vortex-flow regimes, 105–121

**Graham, E. W.** On the steady-state relations between disturbances above and below a critical level, 395–410

**Grimshaw, R.** The effect of dissipative processes on mean flows induced by internal gravity-wave packets, 347–377

**Hagino, M.** *See* Kiya, Suzuki, Arie & Hagino

**Hah, C. & Lakshminarayana, B.** Measurement and prediction of mean velocity and turbulence structure in the near wake of a airfoil, 251–282

**Hasan, M. A. Z. & Hussain, A. K. M. F.** The self-excited axisymmetric jet, 59–89

**Homsy, G. M.** *See* Zick & Homsy

**Hussain, A. K. M. F.** *See* Hasan & Hussain

**Ikeda, S.** *See* Parker, Sawai & Ikeda

**Khan, Z. A.** *See* Atkinson, Khan & Whitelaw

**Kiya, M., Suzuki, Y., Arie, M. & Hagino, M.** A contribution to the free-stream turbulence effect on the flow past a circular cylinder, 151–164

**Lakshminarayana, B.** *See* Hah & Lakshminarayana

**Leal, L. G.** *See* Olbricht & Leal

**Legner, H. H.** On Kaplun's optimal co-ordinates, 379–393

**Melville, W. K.** The instability and breaking of deep-water waves, 165–185

**Miles, J. W.** On surface-wave diffraction by a trench, 315–325

**Mirie, R. M. & Su, C. H.** Collisions between two solitary waves. Part 2. A numerical study, 475–492

**Olbricht, W. K. & Leal, L. G.** The creeping motion of liquid drops through a circular tube of comparable diameter: the effect of density differences between the fluids, 187–216

**Paidoussis, M. P. & Wong, D. T.-M.** Flutter of thin cylindrical shells in cross flow, 411–426

**Parker, G., Sawai, K. & Ikeda, S.** Bend theory of river meanders. Part 2. Nonlinear deformation of finite-amplitude bends, 303–314

**Peregrine, D. H.** *See* Ryrie & Peregrine

**Pfeffer, R.** *See* Dagan, Weinbaum & Pfeffer

**Ramaprian, B. R. & Shivaprasad, B. G.** The instantaneous structure of mildly curved turbulent boundary layers, 39–58

**Ryrie, S. & Peregrine, D. H.** Refraction of finite-amplitude water waves obliquely incident on a uniform beach, 91–104

**Sawai, K.** *See* Parker, Sawai & Ikeda

**Shivaprasad, B. G.** *See* Ramaprian & Shivaprasad

**Smith, R.** Where to put a steady discharge in a river, 1–11

**Spooner, G. F. & Criminale, W. O.** The evolution of disturbances in an Ekman boundary layer, 327–346

**Stewartson, K.** *See* Brown & Stewartson

**Su, C. H.** *See* Mirie & Su

**Suzuki, Y.** *See* Kiya, Suzuki, Arie & Hagino

**Trinh, E., Zwern, A. & Wang, T. G.** An experimental study of small-amplitude drop oscillations in immiscible liquid systems, 453–474

**Wang, T. G.** *See* Trinh, Zwern & Wang

**Weinbaum, S.** *See* Dagan, Weinbaum & Pfeffer

**Whitelaw, J. H.** *See* Atkinson, Khan & Whitelaw

**Williams, J. C.** Flow development in the vicinity of the sharp trailing edge on bodies impulsively set into motion, 27–37

**Willis, G. E.** *See* Deardorff & Willis

**Wong, D. T.-M.** *See* Paidoussis & Wong

**Wright, J.** *See* DeWitt & Wright

**Zehnder, N.** *See* Escudier & Zehnder

**Zick, A. A. & Homsy, G. M.** Stokes flow through periodic arrays of spheres, 13–26

**Zwern, A.** *See* Trinh, Zwern & Wang
